IISDR Supports Skill-Based Education for Postgraduate Students through Annual Reflection Program at Roshni Nilaya, Mangaluru

As part of the Memorandum of Understanding (MoU) between **Indian Institute of Skill Development and Research (IISDR)** and the **School of Social Work, Roshni Nilaya, Mangaluru**, IISDR supported the organisation of the **Annual Reflection Program 2026**, a skill-based educational initiative for postgraduate students of MSW, MSc Counselling, and MSc Criminology and Forensic Science. Held on August 11 & 12, 2026 at Maria Paiva Hall, the two-day programme was supported by IISDR and designed to complement academic learning through experiential activities, interactive sessions, and reflective exercises.

The programme focused on developing essential life skills, emotional intelligence, positive relationship building, prioritisation, purposeful living, and ethical responsibility in the age of Artificial Intelligence. Through the contributions of eminent resource persons, students gained practical insights into personal growth, professional integrity, respectful relationships, and responsible technology use.

This initiative reflects IISDR's commitment to promoting skill-based education, holistic development, and industry- and society-relevant competencies among postgraduate students, in alignment with its collaborative efforts with academic institutions to nurture socially responsible, ethically grounded, and professionally competent graduates.

The Annual Reflection Program 2026 concluded with students carrying forward valuable reflections on gratitude, relationships, purpose, personal growth, and integrity into their academic, professional, and personal journeys.
